

The COVID-19 epidemic that originated in China has spread rapidly around the globe, dashing hopes that the outbreak would be contained and short-lived. Stock markets that had been largely resilient fell sharply in the last week of February as infection spread to over 60 countries. China's drastic containment efforts clobbered production and consumption within the country and have disrupted supply chains worldwide. With the global spread of the virus and related containment efforts, similar shutdown scenarios may play out elsewhere, increasing the likelihood of a global recession.

We have not materially changed the geographic or sectoral structure of our portfolios in response to the outbreak. Nor have we adjusted our process: as always, our analysts are evaluating the potential impact of the situation on our individual companies. Our holdings are diverse and will not be uniformly affected. For example, sportswear manufacturer **Adidas** faces longer-term challenges as inventories significantly rise due to a decline in sales. Clearing excess inventory takes time and requires discounting that, if not well executed, could hurt the company's brand image and pricing power. The company's inventory buildup in China appears manageable; however, a buildup of inventory globally could become more serious as the epidemic spreads. A counter example is **Sysmex**, a Japanese manufacturer of blood-testing equipment and reagents. China accounts for approximately 25% of the company's sales, and we expect the outbreak will lead to increased demand for some of the company's products in China and beyond.

BENCHMARK PERFORMANCE BY SECTOR – FEBRUARY

- Communications Services stocks were relatively resilient, with online media consumption expected to grow as people stay home to avoid infection.
- Energy stocks fell alongside the oil price, which dropped 11%. China's efforts to contain the virus outbreak slowed the country's economy and reduced its demand for oil and other commodities.

BENCHMARK PERFORMANCE BY GEOGRAPHY – FEBRUARY

- In Europe, markets inside and outside the eurozone fell as the UK and EU prepared for post-Brexit trade negotiations.
- In Emerging Markets (EMs), the MSCI China Index rose 1% as the number of new COVID-19 cases fell in the country.

PERFORMANCE ATTRIBUTION BY SECTOR – FEBRUARY

- In Health Care, Japanese drug maker **Chugai Pharmaceutical** reported stronger-than-expected earnings and guidance.
- In Consumer Discretionary, the share price of Adidas declined after management acknowledged a sharp sales decline in China, one of its largest markets.

PERFORMANCE ATTRIBUTION BY GEOGRAPHY – FEBRUARY

- Our good relative performance in the eurozone was helped by **Schneider Electric**, a manufacturer of electrical equipment and related software. The French company reported better-than-expected earnings, and management offered a reassuring outlook of organic growth.
- Stock selection in EMs was hurt by Brazilian brewer **Ambev**, which announced disappointing beer sales in its home market.
