Investment Objective and Policies

Investment Objective:

The investment objective of the Fund is to achieve long-term capital appreciation by investing primarily in equities of companies based in global markets other than the United States of America.

Investment Policies:

The Fund seeks to achieve its objective by investing in companies in developed markets outside of the United States of America, as well as in established companies in emerging and frontier markets that the Investment Manager regards as well managed, financially sound, fast growing, strongly competitive and priced by the market below their estimated value.

The Fund will invest in freely transferable equity and equity related securities primarily of issuers listed or traded on a regulated stock exchange or domiciled in the following countries or regions: Europe, the Pacific Rim, Canada, Mexico and emerging or frontier markets.

The securities will primarily be common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants (not more than 5% of the Fund's Net Asset Value) including participatory notes structured as warrants, rights (which are issued by a company to allow holders to subscribe for additional securities issued by that company), convertible securities, as well as depository receipts for such securities, and Structured Financial Instruments (such as equity-linked notes or participatory notes) all of which are traded on stock exchanges or regulated markets. The Structured Financial Instruments may embed a derivative.

The Fund will invest on a long only basis.

The Fund may also invest (up to 10% of its Net Asset Value) indirectly in such securities through holdings in open-ended collective investment schemes that satisfy Regulation 3(2) of the Regulations which shall be predominantly in the form of exchange traded funds and listed and traded in the US and Europe.

At all times at least 70% of the Fund's net assets will be invested in the foregoing instruments, i.e. in freely transferable equity and equity related securities primarily of issuers listed or traded on a regulated stock exchange or domiciled in Europe, the Pacific Rim, Canada, Mexico and emerging or frontier markets. The Fund will be highly diversified and therefore will not be concentrating on any specific regions or economic sectors. It will pursue a policy of active stock selection in the markets in which it operates.

No more than 30% of the Net Assets of the Fund may be invested in emerging and frontier markets.

The Fund may hold investments from time to time that are listed or traded in Russia. It is not anticipated that such investments will normally constitute a substantial element of the Fund and shall not in any event exceed 20% of the net assets of the Fund. Investment will only be made in equity securities that are listed or traded on level 1 or level 2 of the RTS Stock Exchange and MICEX.

Investment Restrictions

The general investment restrictions set out under the heading **FUNDS - Investment Restrictions** in the Prospectus shall apply.

Borrowings

In accordance with the general provisions set out in the Prospectus under the heading **FUNDS - Borrowing and Lending Powers** the Fund may borrow up to 10% of its net assets on a temporary basis.

Leverage

It is not intended that the Fund will be leveraged, however, should leverage be generated by the use of financial derivatives instruments it will not exceed 100% of the Net Asset Value of the Fund thus total exposure cannot exceed 200% of Net Asset Value. The market risk of the Fund associated with the use of financial derivative instruments will be measured using the commitment approach in accordance with the requirements of the Central Bank.

Risk Factors

The general risk factors are set out in the Prospectus under the heading **RISK FACTORS**. In addition, the following risk factors apply to the Fund:

Market Risk

Investments in the Fund may lose value due to a general downturn in stock markets.

Currency Risk

The Base Currency of the Fund is US Dollars. As the Euro and Sterling classes are denominated in a currency other than the Base Currency of the Fund, and as currency conversions will take place on subscriptions, redemptions, exchanges of shares and distributions at prevailing exchange rates, the Euro and Sterling Classes will have a currency risk exposure to US Dollars.

Emerging Market and Frontier Market Risk

An investment in this Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Emerging market securities involve unique risks such as exposure to economies less diverse and mature than that of the US or more established foreign markets. Economic or political instability may cause larger price changes in emerging market securities than in securities of issuers based in more developed countries.

Investments in frontier markets involve risks similar to investments in emerging markets but to a greater extent since frontier markets are even smaller, less developed and less accessible than emerging markets. Frontier markets may also experience greater political and economic instability and may have less transparency, less ethical practices, and weaker corporate governance compared to emerging markets. The countries that comprise frontier markets include the lesser developed countries located in Africa, Asia (including countries in the Commonwealth of Independent States, formerly the Soviet Union), the Middle East, Eastern Europe and Latin America.

Russian markets

As the Fund may invest in Russia, investors should note that Russia has different corporate governance, auditing and other financial standards to developed markets, which could result in a less thorough understanding of the financial condition, results of operations and cash flow of companies in which the Fund invests. Accordingly, an investment in shares of a Russian corporation may not afford the same level of investor protection as would apply in more developed jurisdictions.

Risk Management Process

The Fund employs a Risk Management Process which enables it to accurately measure, monitor and manage the various risks associated with financial derivative instruments and which is available to investors.

Dividend Policy

There are no dividend entitlements for Euro or US Dollar Classes.

The Directors intend to declare a dividend in respect of the Sterling Class A Shares and the Sterling Class I Shares such that substantially all of the net income relating to such Classes shall be distributed on a semi-annual basis (on or about 15 April and 15 October in each calendar year). Such dividends shall be paid to Shareholders in accordance with the terms of the Prospectus.

UK Reporting Fund Status

It is intended that UK reporting fund status be sought in respect of the Sterling Class A Shares. Although the Directors will endeavour to ensure that approval of this Class as a reporting fund is obtained and retained, this cannot be guaranteed. Further details of the consequences of reporting fund status for those shares in respect of which it is obtained are in the Prospectus.

It is currently not intended that UK reporting fund status be sought in respect of any other share classes in the Fund (the “Non-reporting Fund Shares”), including without limitation, the Euro Class A Shares, the Euro Class I Shares, the US Dollar Class A Shares, the US Dollar Class M Shares, the US Dollar Class I Shares and the Sterling Class I Shares. Any gains arising to investors resident or ordinarily resident in the UK on the disposal of Non-reporting Fund Shares (or Sterling Class A Shares if reporting fund status is not obtained and retained for them) will be taxed as income rather than capital gains. One consequence of this treatment is that UK resident or ordinarily resident individual shareholders will not be able to utilise the capital gains tax annual exemption to reduce their liability to UK tax on a disposal of such Shares.

Accordingly, the reportable income statement referred to in the Prospectus will only be provided to those Shareholders to whom it is required to be sent by UK law.

Profile of a Typical Investor

The Fund is suitable for investors seeking capital growth who are prepared to accept a medium to high degree of volatility over a five to seven year market cycle.
